Repairing

Servicing

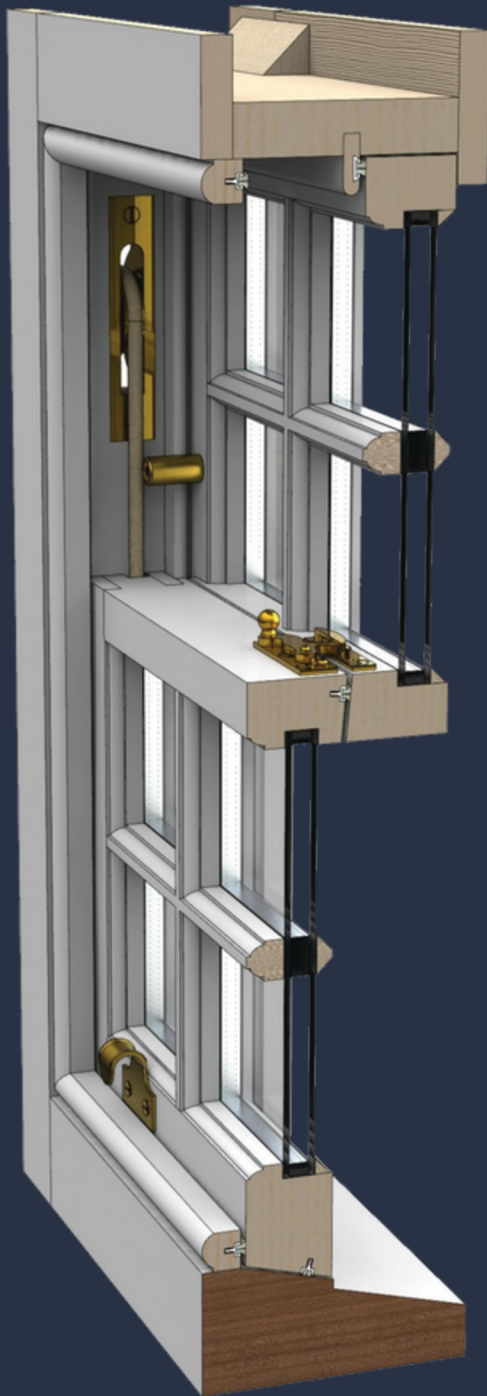

Upgrading

The Solutions Brush Pile System™ for traditional sliding sash windows.

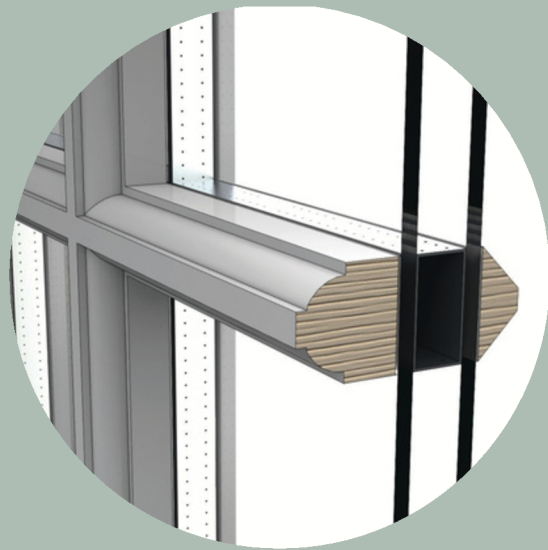

Providing: Expertly repaired and serviced windows • Up to 98% draught proofed
Significantly reduced energy consumption • Easy sliding action with no rattles
Increased comfort levels • Up to 50% exterior noise reduction
Optional ironmongery and security locks in various finishes
ECO friendly solution with very little waste disposal

Replica and Sympathetic Replacements, Period by Design.

All of our windows are bespoke. We can replicate original section sizes, mouldings, horn details and slim period glazing bars. Our new sashes are constructed in the traditional way with glued mortice and tenon joints for strength and longevity. New box frames are constructed with a traditional pulley and weight system. New windows are equipped with traditional replica ironmongery available in various finishes.

In addition to our upgrading service, we can also manufacture and install new gas filled double glazed sashes to match the existing, into your original box frames or if the frames have been removed, we can also replace them.

Arrange an Appointment

Call us to arrange a free, friendly consultation and a detailed survey of your windows followed by a competitive quotation without obligation.

We do not employ salespersons. You will be visited by one of our company Directors or company managers at a time that suits you, to offer you expert and up-to-date advice on the options to suit your needs.
